Passage I (Q.No. 191-195)

It is not luck but labour that makes men. Luck, says an American author, is ever waiting for something to turn up; labour with keen eyes and strong will always turns up something. Luck lies in bed and wishes the postman would bring him news of a legacy, labour turns out at six and with busy pen and ringing hammer lays the foundation of competence. Luck whines, labour watches. Luck relies upon chance, labour upon character. Luck slips downwards to self-indulgence; labour strides upwards and aspires to independence. The conviction, therefore, is extending that diligence is the mother of good luck. In other words, a man's success in life will be proportionate to his efforts, to his industry, to his attention to small things.

191. Which one of the following words in the passage indicates that the writer does not ultimately reject the element of luck ?

- (A) 'Luck whines'

192. Which pair of words means the same thing?

- (A) Luck waits and complains without working while labour achieves success although it complains.
- (B) Luck is self-indulgent, but labour is selfless.
- (C) Luck often ends in defeat but labour produces luck.
- (D) Luck waits without exertion, but labour exerts without waiting.

194. _____ Labour turns out at six and with heavy pen and ringing hammer lays the foundation of competence'. What does this statement mean?

- (A) Labour lays the foundation of the building.
- (B) The writer and the labourer are the true eyes of the society.
- (C) There is no worker who works so hard as the labourer who begins his day at six in the morning.
- (D) Hardwork of all kinds makes people different.

195. Which one of the statements is true about the passage?

- (A) Success depends only on hardluck.
- (B) Expectation of good luck always meets with disappointment.
- (C) Success is exactly proportionate to hard work.
- (D) Luck is necessary for success.

Passage II (Q.No. 196-200)

Violence has played a great part in the world's history. It is today playing an equally important part and probably it will continue to do so for a considerable time. It is impossible to ignore the importance of violence in the past and present. To do so is to ignore life. Yet violence is undoubtedly bad and brings an unending trail of evil consequences with it. And worse even than violence are the motives of hatred, cruelty, revenge and punishment which very often accompany violence. Indeed, violence is bad, not intrinsically, but because of these motives that go with it. There can be violence without these motives; there can be violence for a good object as well as for an evil object. But it is extremely difficult to separate violence from these motives, and therefore, it is desirable to avoid violence as

far as possible. In avoiding it, however, one cannot accept a negative attitude of submitting to other and far greater evils. Submission to violence or the acceptance of an unjust regime based on violence is the very negation of the spirit of non-violence. The non-violence method, in order to justify itself, must be dynamic and capable of changing such a regime of social order.

196. The word 'dynamic' in the concluding line of the passage means:

- (A) active
- (B) energetic
- (C) capable of change and progress
- (D) all of the above

197. Which of the following statements is incorrect?

- (A) Only violence can be used against violence.
- (B) Violence is inherently evil.
- (C) Violence is a historically accepted fact.
- (D) Violence cannot be ignored.

198. "Violence without these motives" is possible only in:

- (A) practice
- (B) reality
- (C) dream
- (D) theory

199. Indeed, violence is bad, not intrinsically, but because of these motives that go with it. This suggests:

- (A) Violence is basically good.
- (B) Violence is bad only when it is associated with certain motives.
- (C) Violence is bad because the people who exercise it are bad.
- (D) Violence is basically bad.

200. Non-violence, according to the writer, means:

- (A) violence without the evil motives.
- (B) giving in to the tyranny of the powerful.
- (C) accepting violence as a fact of life.
- (D) none of the above.
